

A message from the students

Mwikansti Primary School

so they can
Educate to Empower

We, the students of the primary school in Mwikantsi, would like to express our gratitude to St Andrew's College for continuing to help us. The So They Can projects at our school, support our education.

We are thankful that recently we received child protection and safeguarding training. We continue to apply what we learnt every day, and we have established a Child Protection and Safeguarding Desk at our school. Our trained student leaders who operate the desk make sure that our school community is safe.

Together, as strong students, we urge one another not to turn a blind eye to issues of violence against children, and to report any matters as early as possible. At our school, we have prepared a schedule to provide regular information and updates to the school, every Monday and Friday from 3:20-4:30pm.
